Halton Learning Award

Tools and Skills

Design

UI/UX, Motion, and 3D Design
Adobe Creative Suite, Figma, Paper

Development

HTML, CSS, JavaScript, VS Code, Xcode

AI & Emerging Tools

Generative AI workflows (Claude, Codex, Lovable,
Image and Video Generation)

Awards and Recognition

Digital Expressions Fellow

Awarded by Dalio Philanthropies for Adaptive Research Google Gemini project | 2026

Cambridge Innovation Center Grant

Advised biotech entrepreneurs through a CIC Japan Desk x Parsons partnership | 2026

Winner in Construction Product Design

Awarded for Speedstac at Sparkbird Labs
BLT Design Awards | 2024

Certifications

Sustainable UX Design

IBM | 2026

Auditing Design Systems for Accessibility

LinkedIn Learning | 2025

Artificial Intelligence Fundamentals

IBM | 2025

Experience

LOAM Marketplace | Product & Brand Designer

November 2024 - August 2025 (Contract Role)

A mission-driven marketplace that curates sustainable, organic products.

- Lead end-to-end product design across UX/UI architecture, scalable design systems, and brand identity.
- Built 40+ reusable components and patterns to create consistency across product, vendor, and marketing touchpoints.
- Defined core marketplace workflows across vendor onboarding, seller portal, shipping, returns, and customer journeys to improve operational efficiency.
- Integrated Shopify Collective to support a scalable multi-seller ecosystem with 300+ vendors and growing.

Giannone Petricone Associates | Digital Designer

November 2024 - August 2025 (Contract Role)

Design and architecture firm specializing in hospitality and residential development.

- Promoted within 12 months to lead marketing and web initiatives, owning UX/UI design and front-end execution across the firm's digital presence.
- Developed 50+ presentations and proposals for competitive bids, helping secure large-scale development projects through clear, strategic visual narratives
- Built responsive pages and reusable UI components, improving site performance, mobile usability, and overall user engagement.
- Produced 100+ digital and print assets and collaborated with photographers to document new projects, shaping the storytelling and marketing collateral.

WZHM Architects (Sparkbird Lab) | Product Designer

January 2022 - July 2023 (Full-time)

Design firm with an innovation lab developing smart technologies, IOT and UX/UI.

- Designed and launched MySun, a gamified mobile app driving sustainable behavior through eco-footprint tracking and goal-based UX, translating complex data into actionable user insights.
- Organized and branded international hackathons (200+ participants), connecting women in STEM with industry leaders
- Prototyped solar technologies, modular construction concepts, and massing studies for urban data centers, synthesizing research into visual frameworks to communicate complex systems to technical and non-technical stakeholders. Developed visual materials and copy supporting institutional, government, and higher-education proposals.

Competitions

AI Startup Design Hackathon

University of Arizona x Parsons | Feb 27-28 2026

Designed an AI-powered AR health concept for Type 2 diabetes management in 24 hours, owning interaction design, system architecture, and product video.

AI Figma Hackathon

Figbuild | Mar 3-6 2026

Designed an AI-powered wearable that captures real-world inspiration as structured creative data; led the AI product architecture and built the end-to-end prototype.
